Subject: Letter of Commitment for the brazing study in microgravity

To Whom It May Concern:

National Synchrotron Radiation Laboratory (NSRL) in the University of Science and Technology of China, in Hefei, China, is dedicated for scientific research via various X-ray methods. I have a long-term collaboration on nanostructure characterization with Dr. Anming Hu at the University of Tennessee, USA. Dr. Hu has explained to me that he is pursuing a research proposal to develop new nanobrazing in microgravity condition when he visited my lab. I am very interested in his study and would like guide him to apply for some beam time of X-ray analysis for relevant microstructure characterization and phase identification if his proposal is funded.

Please contact me if you need any further information.
